WHY YOU SHOULD CHOOSE CORVID PAYGATE

- Guaranteed updates for life - we won't EOL your solution and force you to upgrade
- Transparent, predictable pricing with no unexpected charges
- We've designed PayGate to keep you in control without unavoidable professional services
- We don't impose usage caps or transaction limits
- Easy worry-free on-boarding – our implementation process is secure, straightforward and fast
- We're part of Ultra Electronics, making us a reliable long-term partner with financial stability, renowned reputation and strong D&B rating

PREMIUM SECURITY AS STANDARD

The CORVID PayGate business, along with its technology and solutions, has premium security standards built into its DNA to give our customers total peace of mind.

With ISO27001 and 9001 certifications, a strong D&B rating and as part of the Ultra Electronics group, our customers benefit from the reputation, stability, financial backing and premium standards demanded by the world's most security-critical businesses.

Our solutions help our customers to mitigate, and even eliminate, myriad risk factors from manual error, fraud, tampering and non-compliance. Features such as user permissions, multi-level approvals, encryption at source, robust audit trails, intelligent automation, two-factor authentication, SMS signing and HSM options all reduce both the risk and the associated cost burden.

FULL INTEGRATION, CUSTOMISATION AND FLEXIBILITY

PayGate is file-agnostic and designed to fully integrate with any file creation or accounting software. It's easily customised to align with your own policies and procedures, giving you totally flexible and keeping you in control.

It supports diverse working patterns, complex multi-company organisational structure, multi-bank relationships and mobile working patterns.

FILE MAPPING AND AUTOMATION

PayGate Designer is our easy to use file mapping and automation tool. It makes it easy for you to define, create and edit your own custom workflows. One-time file mapping translates any file source to the required payment submission, ensuring compliance with required standards are met.

Designer's sophisticated automation functionality takes cost reduction and process efficiency to the next level. Available within PayGate ready to unlock from day one, it empowers you to manage, manipulate and automate your payment procedures and align precisely to your unique business rules.

We believe in keeping you in control of your system and workflows, that's why we've made PayGate Designer easy to use without the need for our Professional Services.

MODULES

PayGate is built on a modern architecture comprising of ready-to-play service modules. Start small then easily scale up by turning on functionality as your business grows. And it helps you manage your budget too, by extending PayGate over time and only paying for the features you want.

SOLUTIONS

DDMS – Direct debit management service

Stay compliant with Direct Debit regulations and deliver exceptional customer service while reducing errors, fraud and costs.

PayGate Validate

Catch bank detail validation errors sooner to reduce investigation and repair costs using real banking system data.

Bacs-approved Bureau Service

Bureau software and services: software that enables you to submit on behalf of your clients and our bureau service that submits for you when you have indirect SUN with no need for smartcards.

Business Continuity & Disaster Recovery

Contingency planning services for when things go wrong; business continuity as a backup and emergency payment submissions on your behalf for total peace of mind.

Faster Payments Aggregator Service

Deliver 24/7 real-time payment services to your customers with secure direct connection to FPS-CI, without technical, cost and compliance obstacles.

HOSTING OPTIONS AND EASY IMPLEMENTATION

PayGate's flexibility extends to the deployment options; from Cloud, hosted and on-premise, the choice is yours.

Whether you're switching from another solution or new to the market, it's fast and easy to get started with PayGate. Our finely tuned on-boarding procedure gets you migrated and ready to make and receive payments within days.

PRICING AND COST MANAGEMENT

Everything about PayGate is flexible and transparent, including pricing options and business terms. Our customers stay with us because our technology is easy to use and it just works. We don't lock you in to rigid contracts, preferring to give you honest, flexible Capex/OpEx pricing options with flexible contract terms for longer-term efficiency.

COMPLIANCE GUARANTEED

PayGate keeps you fully compliant with Bacs rules for customer notifications and reporting. That's reassuring given the rapid rate of change transforming the industry.

Automated workflows, centralised reporting and non-tamper audit trails provide the documented evidence to demonstrate compliance and reveal the cause of any non-conformity for swift rectification.

We make sure PayGate is future-proof by investing continually in product development; this ensures you're always ready to meet the dictates of new regulations such as PSD2, NPA and GDPR.

With our deep expertise and industry relationships curated over several decades, we're perfectly placed to deliver the right consultancy, information and guidance at the earliest stage. That means you benefit from honest advice and guidance on the impact of industry changes on your business.

SUPPORT

Choose from a range of support options that best suit your business, all delivered by a UK-based, security cleared support team. With decades of combined payment experience and dedicated direct telephone number and email address, our experts are ready to help when you need them.
